

Flock Tape

Flock Tape is a noise and vibration harshness [NVH] and buzz, squeak, and rattle (BSR) protective tape. This barrier-creating tape offers both automotive and furniture protective applications. This is available in slit width rolls or custom die-cut parts meeting your application requirements.

The flock substrate is made from nylon flock fibers with a heavy cloth backing and the adhesive is one sided ranging from Low VOC acrylics to rubber based. The flock is currently supplied in black or a natural off white color. Other colors are available subject to minimums. Most of the current Flock tape supplied are for automotive related applications, however, lower grades of flock are available for less stringent applications than automotive such as decorative applications, appliance industry, polishing pads for lens manufacturer's, etc.

Benefits:

- * Low outgassing properties
- * Good heat resistance and strong adhesion to low surface energy materials
- * High abrasion resistance and NVH reduction
- * Anti-squeak properties with high wear resistance
- * Highly Conformable
